How to Calculate Charges

1. Choose the UPS domestic service for your shipment. Refer to your UPS Zone Chart at ups.com/rates to determine the appropriate zone.

2. Determine the shipment's billable weight by totaling the weights of the individual packages in the shipment. Any fraction of a pound in the total should be rounded up to the next whole pound.

If the dimensional weight of a package exceeds the actual weight, the dimensional weight of the package will be used to calculate the shipment's billable weight. (See the current *UPS Rate and Service Guide* for instructions on how to determine dimensional weight.)

A package is considered a "Large Package" when its length plus girth

$[(2 \times \text{width}) + (2 \times \text{height})]$ combined exceeds 130 inches, but does not exceed the maximum UPS size of 165 inches.

Large Packages are subject to a minimum billable weight of 90 pounds. A Large Package Surcharge of \$45.00 will apply. An Additional Handling charge will not be assessed when a Large Package Surcharge is applied. After calculating the rate of the package, compare the rate to the minimum billable rate, and apply the greater of the two.

3. **For UPS Ground:** Divide the shipment's billable weight by 100 to determine the number of Hundredweight units.

4. **For UPS Ground:** Multiply the number of Hundredweight units

by the Shipment Rate Per Hundredweight Unit shown for the appropriate tier and zone on the UPS Ground rate chart.

For UPS Next Day Air®, UPS Next Day Air Saver®, UPS 2nd Day Air A.M.® and UPS 2nd Day Air®: Multiply the shipment's billable weight by the Rate Per Pound shown on the appropriate service and tier on the UPS Air Services rate chart.

Note: Some UPS Ground shipments less than 500 pounds may be more economically rated as 500 pounds. The UPS billing system will automatically compute the shipment charges at both the shipment-billed weight and at 500 pounds, compare them and bill the lower of the two.

Minimum Charges

- The minimum charge for a **UPS Ground** shipment will be the greater of either a charge based on 15 pounds per package or a per-shipment minimum

charge for the applicable zone as shown below.

- The minimum charge for a **UPS Next Day Air, UPS Next Day Air Saver,**

UPS 2nd Day Air A.M. or UPS 2nd Day Air shipment will be based on an average weight of 10 pounds per package.
