How to Process Your Shipments (continued)

To determine the weight, zone, rate and additional charges for your packages, follow these steps.

2. Determine the Weight

For Domestic and International Individual Package Shipments.

Determine Actual Weight

The package weight rounded up to the next whole pound.

Determine Dimensional Weight

Multiply the length by the width by the height (each rounded to the nearest whole inch) of each package to determine its cubic size.

For domestic shipments, divide the cubic size by 139 to determine dimensional weight in pounds. For international shipments divide the cubic size by 139 to determine the Dimensional weight in pounds. Round up fractions of a pound to the next whole pound. Compare Actual Weight with the Dimensional Weight of package. The larger of the two is the billable weight and should be used to calculate the rate. For multi-package shipments, add the Billable Weight of all packages in the shipment for the total.

Dimensional weight may be applied to all services offered by UPS, whether domestic in Puerto Rico or to and from the United States and internationally.

When the Dimensional Weight exceeds 150 pounds

- Apply Rate per Pound shown at the bottom of the Rate Chart for the following export services: UPS Next Day Air Early , UPS Next Day Air, UPS 2nd Day Air, UPS Worldwide Express Plus, UPS Worldwide Express, UPS Worldwide Saver and UPS Worldwide Expedited. This also applies for the following import services: UPS Worldwide Express, UPS Worldwide Saver, and UPS Worldwide Expedited.
- Apply the Dimensional Factor shown at the bottom of the Rate Chart for the UPS Next Day Intra service and for the UPS Guaranteed Ground export service. This also applies for the following import services: UPS Next Day Air, UPS 2nd Day Air and UPS Guaranteed Ground.
- Contact the UPS Customer Service Center to obtain information about the restrictions on package dimensions for UPS services.

Shipment Pricing

Shipment Pricing applies when shipping multiple packages to one destination on the same day and the packages are listed on the same UPS Air Waybill or Shipping Label. The sum of the Billable Weight of all packages is considered as one shipment. Shipment Pricing does not apply to UPS Letters since these cannot be part of a multiple-package shipment.

When To Apply Shipment Pricing

Services to the United States

Shipment Pricing applies when the sum of the total Billable Weight of all packages exceeds 100 pounds for the UPS Next Day® Air Early , UPS Next Day Air®, UPS 2nd Day Air®, UPS Next Day Air® Freight, UPS 2nd Day Air® Freight and UPS 3 Day Freight™ NGS services. When the sum of all the packages is less than 100 pounds for the UPS Next Day Air Early , UPS Next Day Air and UPS 2nd Day Air services, each package will be calculated separately.

For UPS Next Day Intra and UPS Guaranteed Ground™ services, Shipment Pricing does not apply. Rates for each package will be calculated separately, based on the weight of the individual package.

International Services

For UPS Worldwide Express Plus®, UPS Worldwide Express®, UPS Worldwide Saver®, and UPS Worldwide Expedited® services, Shipment Pricing is based on the sum of the Billable Weight of all packages of the shipment.

There are no restrictions in the weight or number of packages that make up your shipment.

How to Process Your Shipments (continued)

To determine the weight, zone, rate and additional charges for your packages, follow these steps.

2. Determine the Weight (continued)

For International Palletized Shipments using the UPS Worldwide Express Freight™ Midday and UPS Worldwide Express Freight® Services.

Shipping rates are based on the shipment weight, including the weight of the pallet, and size and origin-to destination distance (refer to page 22). Billable weight is the weight used to calculate the rate. The billable weight will be the greater of the dimensional weight, actual weight and minimum billable weight.

Determine Actual Weight

Actual weight is the weight of the items on the pallet and the weight of the pallet rounded up to the next whole pound. Use a scale to determine the weight. Round any fraction of a pound to the next whole pound.

Determine Dimensional Weight

Dimensional weight reflects pallet density, which is the amount of space a pallet occupies in relation to its actual weight. Dimensional weight may apply to all UPS international package services.

Determine the pallet dimensions in inches. For each dimension, measure at the longest point, rounding each measurement to the nearest whole number (for example, 1.00 to 1.49 will be considered 1, and 1.50 to 1.99 will be considered 2).

Multiply the pallet length by the width by the height. The result is the cubic size in inches. Divide the cubic size by 139 to determine the dimensional weight. Increase any fraction to the next whole pound.

Determine Billable Weight

Compare the pallet's actual weight to its dimensional weight and minimum billable weight. The greater of the three is the billable weight and should be used to calculate the rate.

3. Determine the Zone

- For shipments within Puerto Rico, the zone number is 21.
- To determine the applicable zone for your shipments from Puerto Rico to the U.S. for UPS Next Day Air Early , UPS Next Day Air, UPS 2nd Day Air, UPS Guaranteed Ground, UPS Next Day Air® Freight, UPS 2nd Day Air® Freight and UPS 3 Day Freight™ NGS services, please refer to the Zone Chart on pages 7 and 8.
- To determine the applicable zone for your shipments from the U.S. to Puerto Rico for UPS Next Day Air, UPS 2nd Day Air, UPS Guaranteed Ground, UPS Next Day Air® Freight and UPS 2nd Day Air® Freight services, please refer to the Zone Chart on pages 14, 15 and 16.
- To determine the applicable zone for the country of destination of your exports for UPS Worldwide Express Plus, UPS Worldwide Express®, UPS Worldwide Express Freight™ Midday, UPS Worldwide Express Freight®, UPS Worldwide Saver®, and UPS Worldwide Expedited®, please refer to the Zone Chart on pages 17, 18 and 19.
- To determine the applicable zone for the country of origin of your imports with consignee payment option for UPS Worldwide Express, UPS Worldwide Express Freight Midday, UPS Worldwide Express Freight, UPS Worldwide Saver, and UPS Worldwide Expedited, please refer to the Zone Chart on pages 17, 18 and 19.

Note: If a zone number is not indicated in the corresponding column for the service you want to use, then UPS does not offer this service to that origin and/or destination country.

4. Determine the Rate

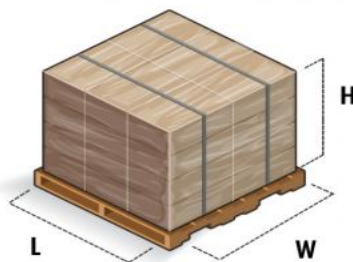

The rate is based on the service, the weight and zone.

5. Determine Additional Charges

To determine if your shipment will incur any additional charges based on UPS additional services for domestic services within Puerto Rico, to/from the U.S. and for international services, please refer to the Additional Charges section on pages 32 through 38 in this Rate and Service Guide.

For your multiple package shipments within Puerto Rico using UPS Next Day Intra service, the rate is calculated based on the weight of each individual package.

Dimensional Factor
If a package exceeds 150 pounds when calculating the dimensional weight, then use the Dimensional Factor to determine your rate.

Multiply the dimensional weight of your package by the Dimensional Factor.

+ For Letter shipments, which weight exceeds 8 ounces, the published rate for the corresponding weight will apply.

Example:
Measurements in inches:
Length = 40"
Width = 30"
Height = 30"

Dimensional Weight:

$$\frac{40" \times 30" \times 30"}{139} = 259$$

Rate: 259 x \$1.05 = \$271.95

For shipments weighing over 150 pounds				
Price per Lb.	4.95	5.15	5.30	5.65

For shipments weighing over 150 Lbs.

To determine the rate for shipments weighing over 150 pounds, the rate is calculated by multiplying the total shipment weight (rounding up to the next full pound) by the price per pound shown at the bottom of the Rate Chart. The minimum charge for a multiple package shipment will be based on an average weight of 10 pounds per package.

For shipments weighing less than 150 pounds, the rate is calculated based on the weight of each individual package, when using UPS Next Day Air service from Puerto Rico to the United States.

UPS Next Day Air® Early

To determine the rate for shipments to the United States with early delivery*, UPS will charge an additional fee of US\$31.50 per package.

Note
Any fraction of a pound is rounded up to the next full pound.

For shipments weighing over 100 pounds				
Price per Lb.	3.85	4.05	4.45	4.95

For shipments weighing over 100 Lbs.

To determine the rate for shipments weighing over 100 pounds, the rate is calculated by multiplying the total shipment weight (rounding up to the next full pound) by the price per pound shown at the bottom of the Rate Chart.

The minimum charge for a multiple package shipment will be based on an average weight of 10 pounds per package.

For shipments weighing less than 100 pounds, the rate is calculated based on the weight of each individual package, when using UPS 2nd Day Air service from Puerto Rico to the United States.

Notes

Any fraction of a pound is rounded up to the next full pound.
 + For Letter shipments, which weight exceeds 8 ounces, the published rate for the corresponding weight will apply.

Rate Chart UPS Guaranteed Ground™

This Rate Chart applies for door-to-door shipments originating in Puerto Rico bound for the United States, using UPS Guaranteed Ground service.

Dimensional Factor

If a package exceeds 150 pounds when calculating the dimensional weight, then use the Dimensional Factor to determine your rate.

Multiply the dimensional weight of your package by the Dimensional Factor.

Example: For a package to be delivered to Zone 1 with the following measurements in inches: Length= 40", Width= 30", Height= 30"

Dimensional Weight:

$$\frac{40" \times 30" \times 30"}{139} = 259$$

Dimensional Factor		
Price per Lb.	9.34	7.96

Dimensional Factor

If a package exceeds 150 pounds when calculating the dimensional weight, then use the Dimensional Factor to determine your rate.

Multiply the dimensional weight of your package by the Dimensional Factor.

Example: For a package originating from any of the 48 contiguous states destined for Puerto Rico using UPS Next Day Air service (Zone 125) with the following measurements in inches:

Length= 40", Width= 30", Height= 30"

Dimensional Weight:
 $40" \times 30" \times 30" = 259$
 139

Rate: $259 \times \$7.67 = \$1,986.53$

Rates are based on the total billable weight of all packages in the shipment. Compare each package's actual weight to its dimensional weight. The greater of the two is the billable weight and should be used to calculate the rate. For multiple-package shipments, total the billable weight of all packages in the shipment.

Notes

Any fraction of a pound is rounded up to the next full pound.

+ For Letter shipments, which weight exceeds 8 ounces, the published rate for the corresponding weight will apply.

Dimensional Factor

If a package exceeds 150 pounds when calculating the dimensional weight, then use the Dimensional Factor to determine your rate.

Multiply the dimensional weight of your package by the Dimensional Factor.

Example: For a package originating from any of the 48 contiguous states destined for Puerto Rico using UPS 2nd Day Air service (Zone 225) with the following measurements in inches:

Length= 40", Width= 30", Height= 30"

Dimensional Weight:
 $40" \times 30" \times 30" = 259$
 139

Rate: $259 \times \$5.66 = \$1,465.94$

Rates are based on the total billable weight of all packages in the shipment. Compare each package's actual weight to its dimensional weight. The greater of the two is the billable weight and should be used to calculate the rate. For multiple-package shipments, total the billable weight of all packages in the shipment.

Notes

- Any fraction of a pound is rounded up to the next full pound.
- + For Letter shipments, which weight exceeds 8 ounces, the published rate for the corresponding weight will apply.

Dimensional Factor

If a package exceeds 150 pounds when calculating the dimensional weight, then use the Dimensional Factor to determine your rate.

Multiply the dimensional weight of your package by the Dimensional Factor.

Example: For a package originating from any of the 48 contiguous states destined for Puerto Rico using UPS Guaranteed Ground service (Zone 45) with the following measurements in inches:

Length= 40", Width= 30", Height= 30"

Dimensional Weight:
 $40" \times 30" \times 30" = 259$
 139

Rate: $259 \times \$4.29 = \$1,111.11$

Note
Any fraction of a pound is rounded up to the next full pound.

For shipments weighing over 150 Lbs.

To determine the rate for shipments weighing over 150 pounds, multiply the total shipment weight (rounding up to the next full pound) by the price per pound shown at the bottom of the Rate Chart. UPS will bill the result of this calculation or the Minimum Rate that is indicated, whichever is greater.

International air shipments may be subject to the Warsaw Convention, including its limitations on legal liability. When the payee is located in a third country, other than the origin and destination countries, then the export rates from the origin country will apply, except when previously agreed to by UPS and the contractor.

For more information about the availability of third party payment option, please contact your local UPS office or your UPS Sales Executive.

* All charges will be billed to the consignee located in Puerto Rico.

Any fraction of a pound is rounded up to the next full pound.
